

Figure #. Connected, partially labeled nearest-neighbor graph of 125 NCGR Ficus SSR profiles as measured by angular displacement, plus Centroid  $\Gamma$  for orientation. Distances are color-coded by quartile. See Appendix B for an over-size fully labeled graph.

■ Quartile #1 < 9.56 mrad   ■ Quartile #2 < 11.5 mrad   ■ Quartile #3 < 13.4 mrad   ■ Quartile #4 ≥ 13.4 mrad

—— nearest neighbor   ——— nearest group   - - - - spatial orientation to  $\Gamma$
